Polysur® type T150 elevator belts are specially designed for use in elevators with an ambient temperature in the elevator of continuous +100°C or higher combined with dry product. By using 3+3 mm thick rubber covers to insulate the carcass from the high operating temperature in combination with a rubber quality such as EPM, the rubber stays longer flexible under the influence of high temperatures resulting in a longer service life of the elevator belt itself.

Applications
- cement powder
- fly ash
- fertilizer
- raw meal
- foundry sand
- cokes
- recycling

Available from stock
- EP 800/4 3,0+3,0 mm

Other constructions available on request.

Polysur® elevator belts are provided with a Polysur® logo after each 20 meter of elevator belt.
